### Operative Dentistry

## EXTENDED DIRECT POSTERIOR RESTORATIONS: GUIDELINES AND CLINICAL PROCEDURES

Direct posterior restorations are the most common procedure performed nowadays in the dental clinics.

These technique allow us to achieve excellent results in terms of both function and esthetics.

Patients understand that it is possible to reach excellence with a minimally invasive protocol. For this reason, will be of paramount importance to understand all the steps and protocols necessary to obtain the most proper clinical results.

### ALESSANDRO CONTI

Graduated in Dentistry magna cum laude at the University of Pavia. He is visiting professor at the University of Pavia (Department of Restorative Dentistry) and was visiting professor at the Eastman Dental Institute (UCL-London). He has held courses and congresses both in Italy and abroad and he is author of scientific publications on peer reviewed dental journals. He is an active member of the Italian Academy of Restorative and Conservative Dentistry (AIC), Italian Academy of Esthetic Dentistry , affiliate of the European Academy of Esthetic Dentistry (EAED) and ambassador of the British Academy of Microscope Dentistry (BAMD). Dr. Conti has established his private practice in the north of Italy cooperating with Dr. Domenico Massironi, Dr. Carlo Ghezzi and Dr. Roberto Rossi. His practice is limited to esthetic restorative dentistry and fixed prosthetics.
